ALL DAY
8:00am-5:00pm Posters on Display ..................................................... Crystal II Ballroom

MORNING:
7:00am-12:30pm Registration/Information................................................... Crystal Foyer
8:00am- 10:00am Morning Sessions (see details below)................................. Locations listed below
10:00am-10:30am Break (Foyer)/Poster Defense with Q/A............................. Crystal II Ballroom
10:30am-12:36am Morning Sessions (see details below)................................. Locations listed below

LUNCH:
12:30pm-2:00pm Lunch Break (on your own)
12:30pm-2:00pm Executive Committee Meeting........................................ Pearl Room, 3rd Floor

AFTERNOON:
2:00pm-5:00pm Registration/Information.................................................... Crystal Foyer
2:00pm- 4:00pm Afternoon Sessions (see details below)................................. Locations listed below
4:00pm-4:30pm Break..................................................................................... Crystal Foyer
4:30pm- 6:30pm Afternoon Sessions (see details below)................................. Locations listed below
6:30pm- 8:15pm Welcome Reception................................................................. Pool Deck

8:00am-5:00pm POSTERS ON DISPLAY Crystal II Ballroom

8:00am-10:00am SELF-ASSESSMENT SESSION A Opal Room
(Separate registration required.)

Course Directors: Carlos A. Torres-Cabala and Jose A. Plaza

8:00am-10:00am ORAL ABSTRACT PRESENTATIONS Crystal I Ballroom
* Abstracts presented in Free Communications will be published online in The American Journal of Dermatopathology

Course Directors: Marina Sandoval and Aleodor Andea
Moderators/Judges: Marina Sandoval, Aleodor Andea, Phyu P. Aung, May P. Chan

Objectives: Gain exposure to and improve understanding of newly described and/or rare conditions affecting the skin and mucosa through presentation and discussion of original work and interesting and/or extraordinary case reports.

8:00am-8:06am BASAL CELL CARCINOMA INDUCED BY THERAPEUTIC RADIATION FOR TINEA CAPITIS - CLINICAL PATHOLOGICAL STUDY
Aviv Barzilai

8:06am-8:12am DEVELOPMENT OF DERMATOPATHOLOGICAL EXPERTISE IN AFRICA
Helmut Beltraminelli

8:12am-8:18am CYCLIN D1 IS USEFUL TO DIFFERENTIATE NEOPLASTIC LANGERHANS CELL FROM REACTIVE LANGERHANS CELL PROLIFERATION
Debajyoti Chatterjee

8:18am-8:24am CLINICOPATHOLOGIC SPECTRUM OF DERMAL HYPERSENSITIVITY REACTIONS (DHRs)
Thinh Chau

8:24am-8:30am CLINICOPATHOLOGICAL CHARACTERISTICS OF CUTANEOUS CARCINOSARCOMAS: A SINGLE INSTITUTION EXPERIENCE OF 16 CASES
Jarish Cohen

8:30am-8:36am CUTANEOUS CYSTS: WHAT LIES BENEATH
Mariá-Teresa Fernández Figueras

**12:30pm-2:00pm Executive Committee Meeting (EC Members Only) Pearl Room, 3rd Fl**

**2:00pm-6:30pm SELF-ASSESSMENT DISCUSSION Opal Room**

(Separate registration required.)

**Course Directors:** Carlos A. Torres-Cabala and Jose A. Plaza

**Objectives:** Recognize key light microscopic features of common, rare, and unusual entities without benefit of immunohistochemistry or histochemistry (special stain); expand diagnostic skills by increasing familiarity with a variety of skin conditions; differentiate between diseases with similar or overlapping histologic features.
Wednesday, February 14, 2018

**Objectives:** At the end of the seminar, the attendees will:
1) Be familiar with the current digital applications dedicated to management of digital images in Dermatopathology. 2) Be able to apply the technique of ex vivo dermoscopy and derm dotting to help in the grossing of Dermatopathology specimens. 3) Be familiar with the current use of virtual reality and enhanced reality when applied to Dermatopathology

**Faculty:**
Marc Haspeslagh: Ex vivo dermoscopy with derm dotting: A new method for lesion specific and targeted cutting.
Ulysses G. Balis: Machine learning and digital analytics in dermatopathology
Lászlo Igali: What can Virtual and Augmented Reality add to dermatopathology and why should you care?

**Objectives:** The diagnosis of cutaneous adnexal neoplasms is often challenging due to their complex nomenclature and classification. The objective of this course is to introduce recently described entities in adnexal proliferations, discuss a practical diagnostic approach of these tumors and expand the knowledge in regard to their diagnosis. In addition, adnexal tumors may be associated with inherited syndromes and visceral neoplasms. Early and correct recognition of these lesions is of utmost importance for patient’s follow-up, prognosis and therapeutic options, especially since cutaneous lesions may be sometimes the first manifestation of the disease.

**Faculty:**
Luis Requena: "Recently described entities in adnexal proliferations"
Doina Ivan: "Things are not always what they seem: how to avoid pitfalls in the diagnosis of cutaneous adnexal tumors"
Omar Sangüeza: “Adnexal neoplasms associated to systemic diseases”
Tim McCalmont: "Everything you wanted to know about tricholemmoma but were afraid to ask".

"How to Secure a Position in a Dermatopathology Fellowship Program",
Tips and Advice from Dermatopathology Fellowship Program Directors

8:00am-4:00pm POSTERS ON DISPLAY Crystal II Ballroom

8:00am-5:00pm SLIDE LIBRARY Opal Room

8:00am-10:00am UPDATE IN LYMPHOPROLIFERATIVE DISORDERS Crystal I BR

Course Directors: Werner Kempf and Joan Guitart

Objectives: 1) To provide insight into new histological and phenotypic variants of mycosis fungoides and Sézary syndrome. 2) To highlight recent advances in cutaneous B-cell lymphomas, in particular cutaneous marginal zone lymphoma and cutaneous diffuse large B-cell lymphoma. 3) To become familiar with the clinicopathological spectrum of cutaneous pseudolymphomas and a proposal for their classification. 4) To recognize the morphological and phenotypic features of secondary cutaneous involvement of systemic lymphomas. 5) To enable identifying the clinical, histological and phenotypic features of immunosuppression-related cutaneous lymphomas.

Faculty:
Jinah Kim: Mycosis fungoides and Sézary syndrome – an update
Werner Kempf: Cutaneous B-cell lymphomas
Christina Mitteldorf: Cutaneous pseudolymphomas 2018
Alejandro Gru: Secondary cutaneous involvement in systemic lymphomas
Joan Guitart: Immunosuppression-related cutaneous lymphomas

10:00am-10:30am - DEFENSE OF POSTERS - Crystal II Ballroom
SEE PRESENTERS AND POSTER TITLES LISTED AT END OF PROGRAM GUIDE
Objectives: Authors of articles with the highest total citation rate in The American Journal of Dermatopathology (AJDP) (during 2010-2016) will present overviews of their papers. Emphasis will be placed on how their goals and data affected the practice of dermatopathology and dermatology. Effectively, this session will provide a broad update in the field of dermatopathology by covering a range of disorders. Following this session, the attendee should be able to: 1. Critically examine key articles, highly cited in the AJDP, which describe advances in dermatopathology. 2. Recognize and apply new dermatopathologic approaches to the diagnosis of skin disease. 3. Appreciate the importance of clinical-pathologic correlation for the diagnosis of skin disease.

Faculty:

Thursday, February 15, 2018

1:30pm-2:30pm 2018 "SABINE KOHLER LECTURE AND AWARD"  Crystal I Ballroom

Lecturer:  Ignacio I. Wistuba, M.D
Department Chair, Department of Translational Molecular Pathology
Division of Pathology/Lab Medicine
Anderson Clinical Faculty Chair for Cancer Treatment and Research
The University of Texas - MD Anderson Cancer Center, Houston, TX

“Application of Liquid Biopsies to Pathology Diagnosis: No Longer a Future Possibility”

2:30pm-4:30pm SYSTEMIC DISEASES UNDER THE MICROSCOPE Crystal I Ballroom

Course Directors:  Dieter Metze and Anjela Galan

Objectives: During this session, the attendees will advance their knowledge of systemic cutaneous diseases, including lupus erythematosus, panniculitis, endocrine and metabolic disorders, critically ill patients, as well as alerting inflammatory patterns, and a comprehensive review of pruritus.

Faculty:
Anjela Galan:  Lupus Erythematosus: What Lies Beneath
This lecture will focus on updates in pathogeneses of lupus erythematosus, helpful microscopic features, and unusual presentations that can lead to diagnostic pitfalls.

Margot Peters:  Panniculitis: Systemic or Localized (Sub)Cutaneous Disease?
Case-based approach to subcutaneous pathology to better understand when panniculitis is a manifestation of systemic as compared with localized disease.

Franco Rongioletti: Skin Signs of Endocrine and Metabolic Disorders Under the Microscope
Although endocrine and metabolic diseases are regularly included in general textbooks of dermatology, one gains the general impression that these topics receive little emphasis from a dermatopathological point of view. In this setting, clinico-pathological correlation is essential.

Almut Böer-Auer:  "Warning light: Patterns and Clues that put on the Alert"
Based on selected cases, this lecture intends to highlight patterns that should always prompt clinical correlation and examination for associated systemic diseases. The patterns include neutrophil-rich infiltrates (e.g., neutrophilic urticarial dermatosis, Sweet-like infiltrates), histiocyte-rich infiltrates (e.g., sarcoidal granulomatous, xanthogranulomatous, Langerhans-cell-rich), and some quite subtle, easily overlooked surprises!

Jeffrey North:  Inpatient Dermatopathology: Instructive Cases from the Hospital Ward
This lecture will focus on histopathology of critically ill patients and how to work through differential diagnoses of various blistering and inflammatory dermatoses.

Dieter Metze:  Pruritus Under the Microscope
Pruritus is one of the most distressing symptoms of internal, neurological, systemic and dermatologic diseases. The lecture focuses on major progress in neurophysiology, understanding of the clinical aspects, pathologic features, classification of pruritus, and novel diagnostic tools (bioptic evaluation of intraepidermal nerve density).
5:00pm-6:30pm  "IN THIS RING, WOMEN WARRIORS' MATCH"  Crystal I Ballroom
Referee: Omar Sangüeza

Four teams of each, drawn at random from the "contenders" below, will face off in this Match! Good luck teams!

Objectives: At the conclusion of the "Match", the participants should be able to:
1) Envision the clinical appearance of lesions based on the history and descriptive narratives provided with each specimen. 2) Formulate a differential diagnosis, using the history and clinical description prior to reviewing the histology. 3) Understand the basic concepts, including background, clinical and histological features and treatment, pertaining to each case. 4) Comprehend the importance and necessity of clinical correlation in relation to microscopic findings to provide a correct diagnosis. 5) Expand knowledge of a wide variety of cutaneous disease processes, including neoplasms, inflammatory, infectious, and autoimmune diseases.

Patricia Alvarez  Rossitza Lazova
Almut Böer-Auer  Maria Eugenia Mazzei
Maria Teresá Fernández-Figueras  Beth S. Ruben
Tammie Ferringer  Marcela Saeb-Lima
Anjela Galan  Marina Sandoval
Jacqueline Junkins-Hopkins  Sonia Toussaint-Caire

POSTER PRESENTERS & POSTER TITLES

POSTER PRESENTERS WERE ASKED TO CHOOSE ONE DISCLOSURE STATEMENT BELOW THAT PERTAINS TO THEIR POSTER, AND INCLUDE THAT STATEMENT AT THE BOTTOM RIGHT ON THEIR POSTER:
1. NOTHING TO DISCLOSE
OR:
2. I do have a financial interest or other relationship* with the manufacturer(s) of any of the product(s) or service(s) discussed in my presentation, as follows: (list the manufacturer(s) or provider(s) by name and describe the nature of the relationship)
*Financial interest or other relationship can include grants or research support; being an employee, consultant, stockholder, member of speakers’ bureau; complimentary use of equipment, receipt of travel expenses, etc.

WEDNESDAY'S POSTERS, FEBRUARY 14, 2018
10:00am-10:30am  - Defense of Posters with Q/A -  Crystal II Ballroom

AN UNUSUAL PRESENTATION OF PORPHYRIA CUTANEA TARDA
Adhikari, Prajesh

SKIN INVOLVEMENT IN CHRONIC LYMPHOCYTIC LEUKEMIA: CASE REPORT AND REVIEW OF LITERATURE

Safeer, Laraib Z.

META-ANALYSIS ILLUSTRATES ROLE OF INTERFERON AND T HELPER CELL SIGNALING IN SJOGREN’S SYNDROME
Safeer, Laraib Z.

AN ECCHYMOTIC NODULE ON THE SCALP OF AN ELDERLY MALE MIMICKING ANGIOSARCOMA
Saleh, Jasmine

EBV-POSITIVE EXTRANODAL NK/T-CELL LYMPHOMA PRESENTING AS PRIMARY CUTANEOUS LESION MIMICKING VASCULITIS
Saluja, Rasleen

CUTANEOUS COLLAGENOUS VASCULOPATHY
Saluja, Rasleen

PERIANAL EXTRAMAMMARY PAGET’S DISEASE WITH BASAL CELL CARCINOMA-LIKE CHANGES
Sayah, Maryam

DIFFUSE LARGE B-CELL LYMPHOMA MIMICKING PANNICULITIS
Sharain, Rosalind F.
AN UNIQUE CASE OF COMBINED KELOIDAL AND MYXOID DERMATOFIBROMA  
Shokouh-Amiri, Mohammad

MIXED APOCRINE TUMOR OF THE SKIN  
Sorokina, Anastasia

PRIMARY VARICELLA PRESENTING WITH COEXISTENT FEATURES OF PLEVA  
St. Claire, Kayla

MULTIFOCAL ANGIOMATOSIS WITH “HYALINE” THROMBOSIS: THE PRESENTATION OF UNDIAGNOSED WALDENSTROM’S MACROGLOBULINEMIA  
Stoddard, Hugh

ECCRINE GLAND INDUCTION IN DERMATOFIBROMA: A CASE REPORT  
Strausburg, Matthew

TRICHOADENOMA ON THE FOREARM: A CASE REPORT OF AN UNCOMMON ENTITY IN AN UNIQUE LOCATION  
Strausburg, Matthew

ERYTHEMA ELEVATUM DIUTINUM PRESENTING AS PLANTAR NODULES  
Swanson, Leah A

CUTANEOUS B-LYMPHOBlastic LYMPHOMA IN A CHILD WITH ACUTE MYELOID LEUKEMIA: IDENTICAL CHROMOSOMAL TRANSLOCATIONS SUGGESTIVE OF TRANSLINEAGE DIFFERENTIATION  
Tan, Timothy

CLINICAL-PATHOLOGICAL CORRELATION IN A CASE OF IDIOPATHIC ERUPTIVE MACULAR PIGMENTATION (IEMP)  
Tashakori, Mehrnoosh

PRIMARY CUTANEOUS ACRAL CD8+ T-CELL LYMPHOMA  
Tjahjono, Leonardo A.

SCLERODERMA-LIKE SKIN CHANGES INDUCED BY CHECKPOINT INHIBITOR THERAPY  
Tjarks, B. Joel

CHRONIC GRANULOMATOUS DISEASE  
Toosi, Siavash

ROLE OF THE DERMATOPATHOLOGST IN DIAGNOSIS OF NEUODEGENERATIVE DISEASES  
Toosi, Siavash

EXPLOSIVE GENERALIZED POLYMORPHOUS ERUPTION AS A MANIFESTATION OF ANGIOIMMUNOBlastic T CELL  
Toosi, Siavash (on behalf of Emily Gaster)

EDUCATIONAL GAPS IN MOLECULAR DIAGNOSTICS, GENOMICS, AND PERSONALIZED MEDICINE IN DERMATOPATHOLOGY FELLOWSHIP TRAINING  
Torre, Kristin
PEDIATRIC GRANULOMA ANNULARE WITH HYPERTRICHOSIS: AN ATYPICAL PRESENTATION OF A COMMON DERMATOSIS
   Umphress, Brandon

HYDROA VACCINIFORME-LIKE LYMPHOPROLIFERATIVE DISEASE: A CASE OF DELAYED DIAGNOSIS
   Uzoma, Miranda

CUTANEOUS SYNCYTIAL MYOEPITHELIOMA: A NONDESCRIPT SKIN TUMOR WITH SERIOUS DIAGNOSTIC PITFALLS
   Wales, Cameron

THE ROLE OF DIGITAL WHOLE SLIDE IMAGES IN DERMATOLOGY RESIDENCY TRAINING
   Wieder, Shira

PSA POSITIVITY IN EXTRA-MAMMARY PAGET’S DISEASE
   Williams, Grant

ACROKERATOSIS PARANEOPLASTICA PRESENTING IN A CHINESE PATIENT WITH GASTRIC ADENOCARCINOMA
   Xue, Lijun

EPITHELIOID ANGIOSARCOMA AT AN ARTERIOVENOUS GRAFT SITE IN AN IMMUNOCOMPETENT HOST
   Zerah, Michele
