

5. AFRICAN DERMATOPATHOLOGY CONFERENCE (ADPC)

Hotel Marriott, Kigali, Rwanda
February 4-5th, 2019

5. African Dermatopathology Conference

Kigali, Rwanda, February 4-5th, 2019 - Hotel Marriott

Since 2015 we yearly organize the ADPC, the first 4 editions were at the RDTC at the KCMC in Moshi, Tanzania. In 2018 there were 61 participants from 12 African countries, from 4 continents, 2/3 dermatologists and 1/3 pathologists. The participants suggested rotating the conference in different African countries in order to allow a better networking of the specialists from different regions of the continent.

The next ADPC will be in Kigali, Rwanda. The Rwandan Dermatology has already a long history. Since 1982, there is a dermatology department at Centre Hospitalier Universitaire de Butare (CHUB), and since 1992 in Kigali. In Rwanda, there are 8 dermatologists and 9 pathologists.

Light microscopy studies of skin biopsy together with clinical evaluation are the most important steps in dermatological diagnosis. The availability of dermatopathology services significantly varies across the world. In resource-constrained countries, there is limited or no access at all to specialists such as dermatologists, dermatopathologists or laboratory services. In sub-saharian Africa, trained and/or board certified dermatopathologists are still extremely rare. Therefore, we are training African Specialists since 2009, and we organize an African Dermatopathology Conference since 2015.

The **5. African Dermatopathology Conference** will be held on **February 4-5th, 2019** at the Hotel Marriott in Kigali, Rwanda. The conference will feature sessions on several skin diseases with clinical-pathological correlation, interesting cases presentations, and the dermatopathology games. We will have two days of full-time dermatopathology.

We hope that you will come and join us in Kigali!

Helmut Beltraminelli

Learning Objectives

The course is meant to bring together once a year the African Dermatologists and Pathologists interested in Dermatopathology. The lectures will especially focus on clinical-pathological correlation of skin diseases.

The conference should provide basic information that can be applied to dermatopathology practice in the African continent. At the end of the course participants should improve their skills in the diagnosis of skin disorders.

Since 2016 the “**African Society of Dermatopathology**” (**ASDP**) is having the yearly meeting during the conference. All conference participants are welcome to join the society. We would love to hear your opinions and visions about the future of African Dermatopathology.
