

APRIL 11 & 12, 2024 - INSTITUT CURIE AMPHITHEATER CONSTANT BURG, FRANCE

#### **DIRECTED BY:**

Director of Course Pr Raymond Barnhill, Paris, France

Pr Boris Bastian, San Francisco, USA

New York, USA

Pr David Elder Philadelphia, USA

Pr Richard Scolyer Sydney, Australia

#### **₩ OBJECTIVE**

Following the success of our Courses in 2017, 2018, 2020, and 2022 the objective of the Fifth International Melanoma Course in 2024 will continue to stress due diligence and practical diagnosis of melanocytic lesions. We will emphasize the theme of "Acknowledging uncertainty and avoiding over diagnosis of melanoma", as well as updates of all cutting-edge knowledge on difficult melanocytes lesions relevant to practicing pathologists and clinicians.

institut**Curie** 

This 2024 venue will again include expertise from the SIRIC (Integrated Cancer Research Site at Institut Curie), the WHO 5th Edition Classification of Melanocytic Tumours, the revised MPATH-Dx Classification schema (2023), the MPATH Group, and the International Melanoma Pathology Study Group.

#### ■ THE REVISED MPATH-DX CLASSIFICATION

- Online access in advance and review of digitized images from extensively-characterized cases constituting the MPath study set. This unique study set has been reviewed by the MPath Pathology Panel (Prs. Barnhill, Elder, and Piepkorn), and a large diverse group of pathologists.
- The Course will be practical and based on the extensive experience of the international faculty participating in the Course. The Course will consist of didactic lectures and interactive sessions during the two-day program.

#### **# THE COURSE PROGRAMME AND CONTENT**

• The Course will consist of didactic lectures and interactive sessions during the two-day program.

- \* An approach of practical diagnosis is based on the extensive experience of the international faculty in the Course.
- ${\mbox{\tiny +}}$  The latest advances in ancillary diagnostic techniques including immunohistochemistry and molecular genetics will be emphasized.
- Particular attention will be given to predictive biomarkers for targeted, immune and checkpoint inhibitors therapies.
